

ClinicalKey 全医学信息平台

使用指南

前言

ClinicalKey 是爱思唯尔的旗舰临床解决方案，是当前全球内容类型最全、内容质量最高、检索技术最先进的平台，涵盖全部医学专科，为医疗机构在医、教、研三个方面提供有效支持。

ClinicalKey 为医疗机构提供的价值：

- I. 提升科研产出，推动科研进步
 - ClinicalKey 囊括了上百本高水平全文期刊，为医学研究提供最高质量文献参考。
 - 整合 NIH Clinical Trials 的内容，为国内临床研究提供更加丰富的研究思路和视角，拓宽研究领域，同时为探寻国际合作提供机会。
 - 整合 Medline 摘要为读者提供全面的检索，一站式获取全球最新研究进展，把握医学前沿，减少重复工作和研究。
- II. 提升诊疗质量，破解疑难疾病
 - 基于 Elsevier 自主开发的语义检索技术的驱动，ClinicalKey 可以快速、准确为临床问题提供可能的答案。
 - 基于症状、检查指标等的联合检索，ClinicalKey 可以为医生提供疑难复杂疾病的有效诊断思路，继而为制定合理的治疗方案提供指导。
 - 基于最新诊疗指南和循证医学研究的内容，为疾病的规范化、标准化诊治提供参考依据，提升医疗安全。
- III. 助力人才培养，提升教育质量
 - ClinicalKey 提供的经典参考书、视频、教材等系列内容，为医学生教育、医生培养提供高质量资料来源。
 - ClinicalKey 拥有的数百万张图片可以直接生成 PPT 课件，助力提升教学质量。

ClinicalKey 内容概览：

ClinicalKey 涵盖 12 种类型的资源，包括：全文期刊、图书、视频、诊疗指南、循证医学专论、图片、患者教育、药物专论、临床试验、Medline 摘要等。

1. 推荐浏览器

Microsoft Edge 浏览器 (Win 10 及以上系统) ， 或 360 极速浏览器； 支持右键网页翻译功能。

2. CK 访问地址：www.clinicalkey.com (IP 范围内可直接登陆浏览)

3. 检索和浏览

3.1 语言设置

ClinicalKey 支持中英文检索。用户可以在首页进行相应的语言设置。

3.2 检索

CK 的检索界面简洁，输入关键词后，默认是在“所有类型”资源中进行检索, 用户可以在检索出的结果中进行二次筛选（按照资源类型或学科）

Pulmonary Aspiration

Disease Overview

Goldman-Cecil Medicine - Goldman, Lee, MD; Schafer, Andrew L, MD

Definition

Aspiration, which is defined as the inhalation of any nongaseous foreign substance into the lungs, generally refers specifically to the inhalation of gastric contents or secretions from the oropharynx. Aspiration is a common occurrence, and in most cases it resolves spontaneously without clinical manifestations. Clinically significant aspiration can range from acute pneumonitis and respiratory failure caused by a single massive aspiration to chronic symptoms of respiratory disease caused by recurrent small-scale aspiration. These syndromes may overlap with pneumonia that occurs when the lungs are exposed to bacteria from the gastrointestinal tract (Chapter 91). More

Is Marcus Gunn jaw winking a primitive reflex? Rat neuroanatomy.

Abstract

To investigate a possible trigeminal proprioceptive-oculomotor neural pathway and explore possible synaptic connections between neurons in this pathway. Attempt to bring a new insight to mechanism of Marcus Gunn syndrome (MGS).

Anterograde and retrograde tract tracing was applied and combined with immunofluorescent stain in rats. After electrophysiological identifying mesencephalic trigeminal nucleus (Vme) neurons, intracellular injection of tracer was performed to trace axon trajectory.

Following injections of anterograde tracers into the Vme, labeled terminals were observed ipsilateral in oculomotor and trochlear nuclei (III/IV), as well as in their premotor neurons in interstitial nucleus of Cajal and Dorsocerebric nucleus (INC/DN). Combining with choline acetyltransferase (ChAT) immunofluorescent stain, it showed that Vme projecting terminals contact upon ChAT positive III/IV motoneurons under confocal microscope. By retrograde labeling premotor neurons of the III, it showed that Vme neuronal terminals contact with retrogradely labeled pre-oculomotor neurons in the INC/DN. Axons of intracellularly labeled Vme neurons that respond to electric stimuli of the masseter nerve traveled into the ipsilateral III.

There may exist a trigeminal proprioceptive-oculomotor system neural circuit in the rat, which is probably related to vertical-torsional eye movements. Possible association of this pathway with MGS etiology was discussed.

➤ 在某一本书或者期刊里面进行检索

例如：想要在《柳叶刀呼吸医学》这本刊中检索 COPD, 了解该刊是否有相关的文献，那么可以按照下面的步骤进行：

1. 在首页的期刊模块里面找到这本期刊
2. 点击打开这本期刊，然后如图所示，键入关键词进行检索即可，所检索出的结果仅限这本期刊内。

4. 下载

需要下载图书或者图片时，请登录注册账号。如下图所示，点击首页的“register”按钮，按照提示输入个人邮箱、姓名、并自行设置密码即可完成注册。

注：请尊重版权，禁止滥用。

- CK 上的图书包含以下两类：
 - ✓ 参考书：支持按照章节下载（如下图）。
 - ✓ 教材类：不支持下载，可在线浏览。

BOOK CHAPTER
Colon Cancer and Screening Strategies

David A. Rosman, Dipti K. Lenhart, Nicole D. Horst and Dushyant V. Sahani
Abdominal Imaging, 33, 291-298

Etiology

The causes of the development of colorectal carcinoma and its precursor lesion, the colonic adenoma, are multifactorial and include both genetic predisposition and environmental insults. Risk factors for colorectal carcinoma include familial polyposis syndrome, ulcerative colitis, family history of colorectal cancer, age, male gender, smoking, alcohol intake, and obesity.¹

Prevalence and Epidemiology

Colon cancer is the third most commonly diagnosed cancer and third most common cause of cancer-related death in both men and women. It is responsible for 10% of new cancer cases and 9% of cancer-related deaths annually in the United States, representing an estimated 146,970 new cases and 24,680 deaths each year. The lifetime risk for developing colorectal carcinoma is 5.5% in men and 5.1% in women.² Winawer and associates³ demonstrated a marked reduction in colorectal carcinoma incidence after colonoscopic polypectomy, indicating that screening techniques are essential in the prevention and early detection of colorectal carcinoma.

Clinical Presentation

The clinical manifestation of colorectal cancer includes blood in the stool, change in bowel habits, bowel obstruction, bowel perforation, abdominal pain, diminished appetite, or systemic symptoms such as generalized fatigue and weight loss. However, colorectal carcinoma is often detected in asymptomatic patients at screening.

5.浏览器翻译功能介绍

Edge 或 360 极速浏览器其自带的翻译功能，可以将英文迅速译为中文供用户参考。使用小技巧如下：

- 1) 首先是下载并安装好浏览器；
- 2) 使用上述浏览器登陆 CK；
- 3) 在检索结果的界面中，**点击鼠标右键**选择“翻译成中文”，即可实现中文翻译。
- 4) 如需返回到英文，如所示，浏览器网址栏的标记，选择“原文”或者“翻译”来实现中英文的切换。
